Dear Sir:

We want to express our strong objection to the Road Management Rule and the present Forest Service Policies regarding Forest Management.

The public has a right to access [it is our land – remember?] to National Forest land and the gradual move to convert the National Parks to Wilderness Areas is WRONG and probably illegal.

I thought the Park motto was "Land of Many Uses". Live by your motto --- it should be USED for Recreation AND Timber sales.

Forests are MUCH healthier when harvested in a well-managed plan. Forests left fallow are a Recipe for disaster [terrible fires and dying trees due to disease]. Everyone who lives in the forest areas KNOW this but the ill-informed environmentalists in the big cities just don't get it.

Please reject the mandates of this Administration and do what is right by the Forests and the people of the United States.

Sincerely,

Chuck + Sandra Cory

Chuck and Sandra Cory
