Tribal
Group 1

36

△ EPA not promulgating standards, TMDLs not continuing with implementation

△ Needs clear-cut goals, unified goals for watershed

△ Therefore, UFP best way to achieve goals But only a "fond hope"

△ Barriers between agencies but important to coordinate agency

△ Concerned about impacts to water quantity - whose standards? for quality?

△ Shouldn't do anything on fed. lands that negatively affects tribal waters

△ Would watershed mgmt start at bottom or at top

△ Crossing state-tribal jurisdictions not addressed in UFP
Should mention (acknowledge) state-tribal tensions

- Tribes should be recognized as sovereign nation
- Definition of healthy watershed should include vegetation, diversity
- Funding to get Tribes involved in UFP implementation
- Should emphasize pollution prevention — need more authority over ~~NPS~~ non-point sources

---

Coordination

- Get information out from other agencies

Partnership

36

"Run it like Dick Nelson runs his"

- i.e. Deliver what's been asked for i.e. Being responsive and provide
- Technical expertise
- Seems like litigation is remaining option

- Funding Priorities (Q2)
  - Technical expertise
  - Human health issues
  - Training
  - Salaries that keep people

CAET RECEIVED
MAR 16 2000

- Collaboration (Q3)
  - Need an interagov't task force (w/ authority) to make decisions
  - Need more USGS support for gaging stations
  - Need better data coordination - data gets lost
